25X1

1. The Ruse-Giurgiu bridge will be completed within one year's time, according to Baruchiyki (fnu), head of the economic department of the enterprise building the bridge. Most of the engineers are Soviets and most of the technicians are Czech.
2. The new road from Ruse to the south of Bulgaria has been completed to Turnovo. Construction is now being continued on the section further south to Raykovtsi village (N 42-50, E 25-38). This road is very broad and is being paved for use by heavy vehicles. Since there are no industrial installations being built in this area and since the traffic there does not justify construction of such a road, it is believed that it is being constructed for strategic purposes.
3. A new railroad station and railroad repair shop is being constructed at Debrich (new Tolbukhin).
